Station 14 - Coastal Survey - Day 212

This page is an image-only scan with no embedded text layer. FileDigest detects that text extraction returned nothing and automatically applies OCR to recover the content below, then structures it like any other source.

Morning conditions were calm with light fog clearing by 09:00. Three transects were completed along the northern shoreline. Sample counts are summarized in the table below.

Transect Summary

Transect	Samples	Notes
North A	48	clear
North B	51	fog early
North C	39	tide high
